Field Descriptions (F12) indicates code lookup is available.

TABLE ID

This field will display the six-character Table ID for the table selected on the TABL (Code Table Maintenance List) screen.

TABLE NAME

This field will display the name for the Table ID selected on the TABL (Code Table Maintenance List) screen.

DESCRIPTION

This field will display the description for the Table ID selected on the TABL (Code Table Maintenance List) screen.

STARTING CODE

Enter the first character (or two) of the code you wish to access.

SEL

Enter "A" if you want to add a new code to the table or "M" if you want to modify an existing code on the table. *Only certain staff types have access to add or modify table details.*

CODE

If adding a new code, enter the new code. If modifying an existing code, this field will display the code. *Existing "code" information cannot be modified. If the code must be changed, then the existing code must be end-dated and the new code added.*

START DATE

If adding a new code, enter the date the new code begins. If modifying an existing code, this field will display the current start date for that code and this can be modified.

END DATE

If adding a new code, enter the date the new code ends (this can be left as 99s). If modifying an existing code, this field will display the current end date for that code and this can be modified.

LAST UPDATED

This field will display the date code details were last modified. This date cannot be modified as it is automatically updated by the system.

DESCRIPTION

If adding a new code, enter the description for the new code. If modifying an existing code, this field will display the current description for that code and this can be modified.

Additional Information

None.
